

WARRANTY

Material and Workmanship

Quattro Lighting Inc. guarantees material and workmanship for a period of one (1) year from the date of shipment. The consignee is responsible for inspecting material upon receipt and prior to installation. (Under no circumstances should defective or damaged material be installed). In the event of **freight damage**, a freight claim must be filed with the carrier and a replacement order placed with the factory. If any **defects** should surface after installation, within the warranty period, details of the defect should immediately be reported to the local representative. Quattro will provide replacement material at no cost. All compensation for labor costs must be **preauthorized** by Quattro Lighting.

H.I.D. ballasts and photoelectric controls carry the original manufacture's warranty. All ballasts and photocells are pre-tested before leaving the factory.

Paint / Finish

Due to its multi-stage preparation process and paint finish, Quattro Lighting is able to offer a warranty for a period of five (5) years against corrosion, peeling and fading of more than 20% of the original gloss.
